

To: Hanover County Board of Supervisors

I oppose the approval of a cell tower at 8324 Whippoorwill Road. This is a residential area, and not appropriate for the placement of a 135 foot tall tower. It would be an eye sore in the community, and I would not want it in my back yard.

Should you decide to consider approval, I respectfully request that you place very strict conditions on the cell tower company:

- The cell tower must be disguised in such a manner as to not create an eye sore to the community.
- The cell tower would be the tallest structure in the neighborhood, and may attract a lot of lightning. Should the surrounding residents start experiencing lightning damage, the cell tower company would be responsible for those damages.
- Should the surrounding residents begin experiencing problems with their wireless home phones, your wireless computers, or even their wireless Wii games, the cell tower would be required to shut down until the problems could be fixed.
- If the tower infringes on any wetlands, mitigation for replacement of those wetlands must be complete before construction can begin.
